

本委員会が発案し、主催している「回折構造生物国際シンポジウム（略称 ISDSB）第一回を2003年つくば国際会議場で、又第二回を2007年に東京のタワーホールにて開催した。第三回に当たる ISDSB2010 は国際諮問委員（Professor John Helliwell）の要請によりパリで開催することが第74回運営委員会及び総会において決定された。この時、John Helliwell に回答した条件を下記に示す。

Dear Prof. J. R. Helliwell

Our Committee (Diffraction Structural Biology 169th Committee in JSPS) approved the proposal of Prof. J. R. Helliwell for the 3rd International Symposium on Diffraction Structural Biology (ISDSB2010) in Paris. Our committee hopes that the local committee of ISDSB2010 would keep in mind following two basic philosophies;

1. ISDSB should focus on Structural Biology with X-ray, Neutron and Electron beam diffraction analysis.
2. Program should be prepared based on opinions both from academia and industries because the primary aim of our committee and ISDSB is the cooperation between academia and industries.

Probably the 4th ISDSB will be held in Japan again because holding the ISDSB in Japan is significant for our committee members.

With our best regards

Chairperson of the 169 committee

Noriyoshi Sakabe
